Problem – Solution Fit Template :

The **Problem–Solution Fit** for our project focuses on identifying the difficulties users face in understanding their dietary and lifestyle habits and providing a suitable solution through an interactive **Tableau dashboard**. The solution helps users analyze patterns such as breakfast consumption, eating-out frequency, cooking frequency, and other lifestyle habits using clear visualizations and KPIs.

Purpose:

- **Understand customer problems:** Identify the difficulties people face in tracking and understanding their daily dietary and lifestyle habits.
- **Provide a suitable solution:** Use an interactive Tableau dashboard to convert lifestyle and dietary data into simple and meaningful visual insights.
- **Identify behavioral patterns:** Analyze patterns related to breakfast consumption, cooking frequency, eating-out habits, and other lifestyle choices.
- **Support better decision-making:** Help users understand their existing habits so they can make more informed and healthier lifestyle decisions.
- **Improve awareness:** Present complex lifestyle data through charts, graphs, filters, and KPI cards so that users can easily understand their habits.
- **Understand the existing situation:** Analyze the current dietary and lifestyle patterns of the target users and identify areas where improvements may be needed.
