

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	june 2026
Team ID	
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

🕒 10 minutes to prepare
🕒 1 hour to collaborate
👥 2-8 people recommended

➔

Before you collaborate
A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

A Team gathering
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B Set the goal
Think about the problem you'll be focusing on solving in the brainstorming session.

C Learn how to use the facilitation tools
Use the Facilitation Superpowers to run a happy and productive session.

1

Define your problem statement
What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM

How might we [your problem statement]?

Key rules of brainstorming

To run an smooth and productive session

➕ Stay in topic.	💡 Encourage wild ideas.
➕ Defer judgment.	👂 Listen to others.
🗣️ Go for volume.	👁️ If possible, be visual.

Team Gathering:

- Data Analyst / Tableau Developer
- Nutrition & Wellness Researcher
- Survey & Data Collection Lead
- Dashboard Design & UX Reviewer

Set the Goal:

- Analyze college students’ food choice survey data to uncover patterns in breakfast habits, calorie awareness, stress-driven eating, and cultural cuisine preferences, in order to support academic performance and campus wellness initiatives.

Problem Statement:

- How might we identify the key dietary, lifestyle, and stress-related patterns among college students, and turn them into clear, evidence-based recommendations that improve student health and academic performance?

Step-2: Brainstorm, Idea Listing and Grouping

Brainstorm

Write down any ideas that come to mind that address the problem statement.

Person 1

- Track breakfast frequency vs. reported focus levels
- Flag students skipping meals during exam weeks
- Compare fast-food vs. home-cooked meal frequency

Person 2

- Identify top reasons for comfort food consumption
- Correlate stress levels with snacking frequency
- Highlight late-night eating patterns

Person 3

- Measure fruit and vegetable intake by student group
- Compare calorie awareness across year of study
- Track hydration and beverage choices

Person 4

- Map cultural/cuisine preferences by region
- Analyze cafeteria vs. outside food spending
- Identify students open to healthier alternatives

Person 5

- Build a dashboard filter by year, gender, diet type
- Visualize meal regularity vs. self-reported energy
- Design a KPI card for balanced-diet adoption

Person 6

- Segment students by exercise frequency
- Study link between sleep habits and diet
- Track use of food-delivery apps

Person 7

- Design cafeteria recommendation dashboard
- Suggest healthier combo-meal options
- Model cost impact of adding a salad bar

Person 8

- Create a stress-eating triggers visualization
- Suggest wellness workshop topics from data
- Draft student-facing awareness infographic

Group ideas

Take turns sharing your ideas while clustering similar or related notes. Once grouped, give each cluster a sentence-like label.

1. Meal Regularity & Academic Focus

- Breakfast frequency vs. concentration/focus
- Skipped meals during exams
- Fast food vs. home-cooked comparison

2. Stress & Comfort Eating

- Reasons for comfort food consumption
- Stress vs. snacking correlation
- Late-night eating patterns

3. Nutrition & Calorie Awareness

- Fruit and vegetable intake tracking
- Calorie awareness by year of study
- Hydration and beverage choices

4. Cultural Preferences & Spending

- Cuisine preference by region
- Cafeteria vs. outside food spend
- Openness to healthier alternatives

5. Cafeteria & Wellness Recommendations

- Healthier combo-meal suggestions
- Salad bar cost-impact modeling
- Wellness workshop topics from data

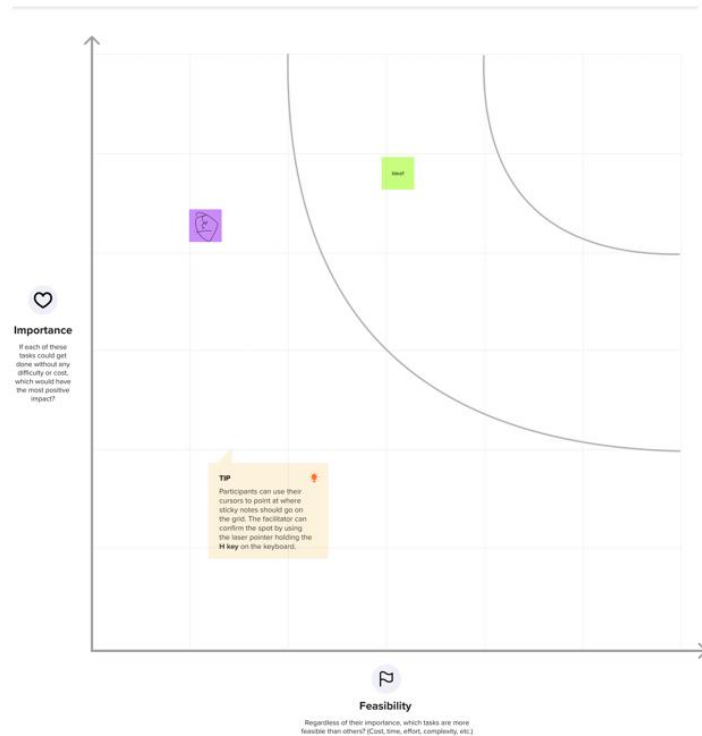

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

**Prioritized Ideas:**

- High Importance, High Feasibility: Breakfast habits vs. academic focus dashboard; Stress vs. comfort food analysis; Cafeteria healthy-options recommendation
- High Importance, Lower Feasibility: Real-time stress-eating trigger dashboard; Institution-wide behavior change program
- Medium Importance, High Feasibility: Calorie & nutrition awareness KPI cards; Fruit/vegetable intake visualization; Food-delivery app usage tracking
- Medium Importance, Medium Feasibility: Cultural cuisine preference mapping; Exercise & sleep vs. diet segmentation
